Mounting Plate
(Litepanels Gemini Series)

8075-0256

26V Gold Mount Plus Dual
Mounting Plate
(SkyPanel S-60C / S-30C)

8375-0241

Converter 26V to 14V Gold
Mount Plus to V-Mount

8375-0240

Converter 26V to 14V Gold
Mount Plus to Gold-Mount

Converter Plate

Continuous power for high-performance cameras and lights

Delivering a continuous 12A draw, DIONIC 26V produces over 300W of consistently reliable power. With no drop in current like dual-voltage batteries, sensitive high-end cameras and lights can draw maximum power with no stress or sudden shutdowns.

Integrate with your existing kit

Simultaneously charge up to four 14.4V Gold-Mount or 26V Gold Mount Plus batteries. With the Converter 26V to 14V Gold Mount Plus to Gold-Mount bracket you can use 26V Gold Mount Plus Batteries on cameras, lights and accessories that are rated at 14V with Gold-Mount battery mounts.

Power all day with one set of batteries

With smart charging technology you can rapidly charge 26V batteries faster than standard 14.4V chargers. DIONIC 26V 240Wh batteries fully charge in just 3.2hrs meaning you can power your camera all day with only 4 batteries.

Ultimate protection for high power production equipment

Anton/Bauer use 3- layers of protection and redundancy inside 26V batteries to protect from common issues such as over-voltage, over-current & over-temperature.
